

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

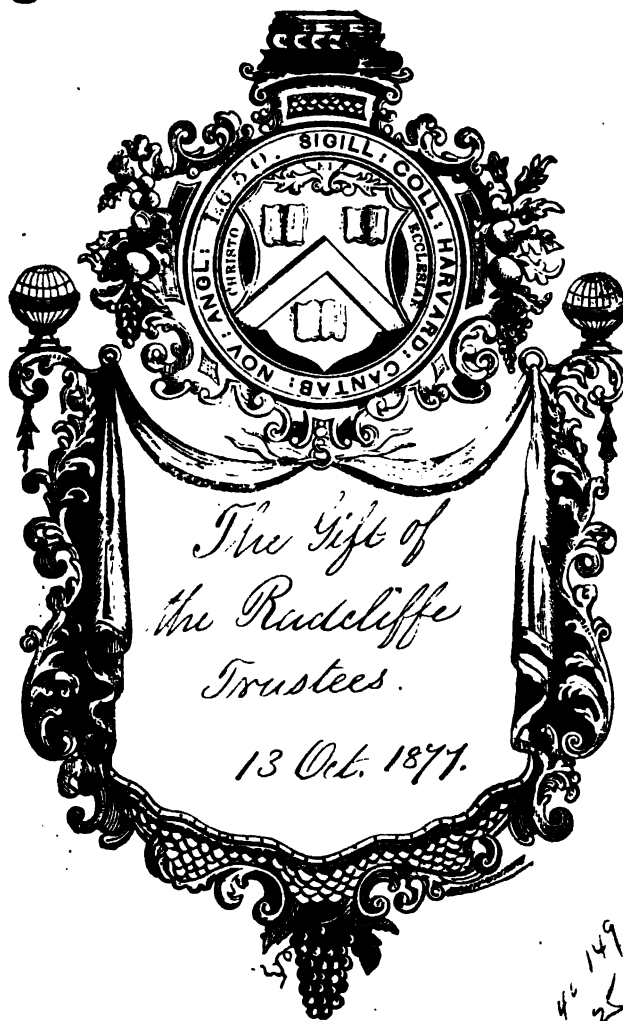

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. CATALOGUE OF BOOKS

ON NATURAL SCIENCE

IN

THE RADCLIFFE LIBRARY

AT THE

OXFORD—UNIVERSITY—MUSEUM

UP TO DECEMBER, 1872.

With an Appendix containing a List of Works on INDIA, having reference to
COMPARATIVE NATIONAL HEALTH.

.c OXFORD:

PRINTED FOR THE RADCLIFFE TRUSTEES.

1877.

1877. Oct. 13,

Gift of
the Radcliffe Trustees.

By agreement between the Radcliffe Trustees on the one hand and the University of Oxford on the other, the Scientific Books, the property of the Trustees, were removed on loan to the University Museum. Their Eastern Manuscripts were made a loan to the Bodleian Library. It having been previously ascertained that the Radcliffe Dome could be conveniently and tastefully connected with the Bodleian Library, it was lent to the Bodleian for a Reading Room, having been first warmed and lighted, and thrown open in the evening to all readers. The transfer was made in the year 1861. The use of the Library at the Museum is not confined (as is sometimes stated) to members of the University. All persons can have access to it on conforming to the Regulations.

This Catalogue comprises the Scientific Books contained in the Radcliffe Library up to the end of 1872. From that time a separate Catalogue of Additions is printed annually. These Additions are every year incorporated in the main Catalogue on the Desk of the Library in eight folio volumes.

TRANSACTIONS and PERIODICALS are not inserted. A separate Catalogue of all SERIALS is printed and may be purchased at the Library with the Catalogue of the STUDENTS' LIBRARY.

For the labour connected with the preparation of the Catalogue the Librarian is indebted to the Sub-Librarian and Assistant Sub-Librarians.

BRITISH ORGANIC REMAINS. Decades I-XII. 8vo.

- Decade I.—ECHINODERMATA, illustrating the genera Uraster, Astropecten, Goniaster, Protaster, Salenia, Echinus,
 Galerites, Nucleolites (Echinobriassus). 1849.
 Decade II.—TRILOBITES, illustrating the genera Phacops, Illænus, Asaphus, Ogygia, Calymene, Olenus, Ampyx.
 1849.
 Decade III.—ECHINODERMATA, illustrating the genera Lepidaster, Uraster, Tropidaster, Hermicidaris, Galerites,
 Dysaster (Collyrites), Micraster. 1850.
 Decade IV.—ECHINODERMATA, illustrating the genera Temnechinus, Acrosalenia, Hyboclypus, Hemipneustes,
 Ananchytes, Cardiastrer. 1852.
 Decade V.—ECHINODERMATA, illustrating the genera Solaster, Diadema, Echinopsis, Echinus, Cidaris, Pyrina,
 Pygaster, Hemiastrer, Brissus. 1856.
 Decade VI.—FISH, illustrating the genera Elasmodus, Palæoniscus, Lepidotus, Pholidophorus, Ophiopsis,
 Ptycholepis, Leptolepis, Lophiostomus. 1852.
 Decade VII.—TRILOBITES, illustrating the genera Phacops, Cheirurus, Sphæroxochus, Encrinurus, Cyphaapis,
 Acidaspis, Trinucleus, Remopleurides, Cyphoniscus, Æglina. 1853.
 Decade VIII.—FISH, illustrating the genera Asteracanthus, Pholidophorus, Histonotus, Aspidorhynchus, Pty-
 cholepis, Oxygnathus, Pycnodus. 1855.
 Decade IX.—FISH, illustrating the genera Cosmolepis, Thriassonotus, Pachyoormus, Endactis, Centrolepis, Notho-
 somus, Pleuropholis, Megalurus, Macropoma. 1858.
 Decade X.—FISH (DEVONIAN), illustrating the genera Glyptolemus, Phaneropleuron, Tristichopterus, Acan-
 thodes, Climatius, Diplacanthus, Cheiracanthus. 1861.
 Decade XI.—TRILOBITES (SILURIAN), illustrating the genera Agnostus, Stygina, Asaphus, Æglina, Staurocephalus,
 Salaria, Angelina, Olenus, Phacops, Paradoxides. 1864.
 Decade XII.—ILLUSTRATIONS of the structure of the Crossopterygian Ganoids. By Thomas H. Huxley. 1866.

APPENDIX.

PREFACE TO APPENDIX.

THE following works have, through the friendly aid of the Duke of Argyll, the Marquess of Salisbury, Sir Bartle Frere, and Mr. Clements Markham, been presented to the Library by the India Office, out of the mass of documents which bear on the recent or present social condition of India.

The Librarian has had in contemplation to form a branch of the Library specially bearing on COMPARATIVE NATIONAL HEALTH*. The works on India were intended to form a part of such series. To these will be gradually added Health Reports of the United States, Germany, France, and all countries which contribute to this now extensive branch of Literature and Science. It is right, however, to observe that the formation of a Catalogue raisonné of works illustrating Comparative National Health is hardly yet possible. The data are not even yet available for defining the Science of Comparative National Health. It has been described as the science 'which has reference to that health which is affected by the circumstances of the whole world, which seeks to compare one nation with another, to ask why one people is more or less healthy; one more or less long lived; which aims at presenting to the mind a correct conception of the circumstances, and the fluctuations in the health of the whole of mankind†.' The factors indeed are derived from subjects of which some are as yet incomplete, as Meteorology, Physical Geography, Ethnology, Laws of Descent, of Ascent, of Species, and many Departments of Sociology—as Education, Crime, Reformation, Value of Human Life as Life, Poor Law, and the intermixture of various Races. The literature therefore will long be heterogeneous and incomplete. Its limits cannot be rigorously defined.

It is to be hoped that the missionary zeal of Oxford will eventually aid this Library in collecting such literature as specially illustrates the Material and Intellectual growth of stationary or progressive Races. The time is not yet come when the harmony between the Material and Spiritual Nature of Man is so appreciated as to bring the Scientific and the Missionary temper into intimate union. But the labours of Max Müller, the Rev. Dr. Legge, Professor Rolleston, and others, may yet convince us in Oxford that Man is only to be scientifically understood when studied by aid of all the lights which can be brought to bear on the history of his physical Development and moral Ascent.
